💡 Interests

I want to work in a team: an internship in a Norwegian company with a smooth transition from intern to employment after the internship. I can work from the office or from home. I can relocate, but only within Norway, if it leads to a permanent, stable job. I am ready to work, learn a new product, and further develop a new strategy to bring value to the company I will work for.

👤 Professional Profile

I am Ruslan Bilohash - a PHP developer of BILOHASH.COM, now in Norway. In Ukraine I worked as an entrepreneur in public procurement (Prozorro): websites, reconstruction of public buildings, and small business projects. I was forced to leave Ukraine and not return because of armed aggression against the country, giving up my own business and any further operations in Ukraine. Today I attend the Norwegian integration language programme and work remotely as a freelancer. I build modern PageSpeed Insights 95+ products in PHP and related stacks, with Grok, Claude Code, GitHub, SSH, Docker and .htaccess as daily tools. I have practised VPS, hPanel, cPanel and phpMyAdmin, and I raise my skill with my own lab solutions - this work gives me real satisfaction: living in two worlds at once. With a clear OOP structure and the right prompt, AI agents deliver strong solutions very fast. Programming has been my hobby for a long time - I have tested many stacks, including game development in Unity and C#. From a technical specification I can deliver a working site with comparable functionality, typically within a day. I also practise defensive security on my own systems (hardening, SQL injection awareness, port scanning).

🔑 Key Qualifications

- Grok xAI chat widgets & lead capture (bilohash.com/ai)
- WordPress.org plugin author - AI Consultant GROK
- Custom PHP CMS & live product demos
- Booking & reservation systems
- Modular admin panels (shop, news, SEO, security)
- PageSpeed Insights 95+ PHP products | spec-to-working site, typically within a day
- AI agents with OOP structure and a precise prompt - fast, strong solutions
- Long-time programming hobby - Unity, C# and many other experiments
- Client products from a spec or screenshot - independent admin panel or WordPress plugin
- Google Ads & Meta Ads - campaign setup that does not waste budget; tested strategies, countries and setups
- Python scripts for deploy to servers or GitHub, and AI-assisted SEO site optimisation
- API integrations I test: reCAPTCHA, PayPal, Stripe, hosting API, Grok, Claude Code, Codex

📁 Work Experience

- Now - Norway: official integration language programme + remote freelance on the internet. Developer of BILOHASH.COM. Modern PageSpeed 95+ PHP products; Grok, Claude Code, GitHub, SSH, Docker, .htaccess; VPS, hPanel, cPanel, phpMyAdmin
- From a technical specification I can ship a working site with comparable functionality, typically within a day. With a clear OOP structure and the right prompt, AI agents produce strong solutions very fast. Programming has been my hobby for years - including Unity and C# game experiments

- Own lab solutions to raise qualification; defensive security on my own systems (hardening, SQL injection awareness, port scanning)
- Lithuania - 1 year at a factory: CNC machines and laser cutting of metal
- Ukraine - entrepreneur in public procurement (Prozorro): websites and reconstruction of public buildings; small business projects. Forced to leave Ukraine and not return because of armed aggression, giving up my own business and any further operations in Ukraine
- I test API integrations: reCAPTCHA, PayPal, Stripe, hosting API, Grok, Claude Code, Codex
- Python scripts to deploy files to servers or GitHub, and to optimise sites for SEO with AI
- Google Ads and Meta Ads: I set up campaigns so the budget is not wasted; tested strategies, countries and setups
- I deliver client products from a technical specification or a screenshot - each with its own independent admin panel or a WordPress plugin (balticclean.lt, elixirspa.lt, tatjanosmasazai.lt, golden-hands.lt and more on bilohash.com)
- 2018 - present - Independent PHP & AI developer: Grok xAI chat, CRM 4.0, CMS demos, WordPress.org plugin

Computer Skills

PHP 8+, Python, MySQL, HTML5, CSS3, JavaScript, C#, Unity, WordPress plugins, Grok xAI, Claude Code, GitHub, SSH, Docker, .htaccess, VPS, hPanel, cPanel, phpMyAdmin, PageSpeed Insights 95+, reCAPTCHA, PayPal, Stripe, hosting API, Codex, Google Ads, Meta Ads, Telegram/WhatsApp/Viber bots, Redis & MySQL caching, OOP & modular admin architecture, i18n, Schema.org & hreflang SEO, CSP & defensive web security, SMTP, cron, backups, responsive UI

Personal Information

Age: 32 years Civil Status: Single

★ Personal Qualities

- Self-directed & reliable
- Product-minded developer
- Lives in two worlds: Norway integration and remote product work
- Clear communication with clients

♥ Hobbies

- Programming as a long-time hobby
- Unity and C# game experiments
- Building open-source PHP tools
- SEO & performance tuning

Languages

Ukrainian (native), Russian (fluent), English (working / A1), Norwegian (A1 - A2 - integration programme, goal B2)

Education and Courses

- Ukrainian secondary school - 10 grades
- Vocational school (bursa) in Ukraine - 2 years
- Construction cost estimating - 1 year: checking DSTU standards and preparing procurement documentation for contractors and clients
- Norwegian integration language programme (currently attending)
- Online courses at Eshko (Ukraine)
- Self-taught full-stack PHP developer - continuous learning via production projects and open GitHub repositories since 2018

Vocational Schools

- Vocational school (bursa) in Ukraine - 2 years
- Construction cost estimating - 1 year: checking DSTU standards and preparing procurement documentation for contractors and clients
- Norwegian integration language programme

Certificates

Various online courses at Eshko (Ukraine). Published author on WordPress.org (bilohash-ai-chat-consultant). Portfolio: bilohash.com with live demos.

References

Available upon request: recommendation letters and client reviews in Ukrainian, including from clients and directors of public procurement.

Multilingual business websites

I build products from the client's technical specification - including from a screenshot. The result is a working site with its own independent admin panel, or a WordPress plugin. More products are on the homepage of bilohash.com.

-  balticclean.lt - Cleaning company in Lithuania - multilingual service site. (<https://balticclean.lt>)
-  elixirspa.lt - Elixir Secret - massage and SPA in Vilnius and Kaunas. (<https://elixirspa.lt>)
-  tatjanosmasazai.lt - Tatjana's massage studio - booking and multilingual pages. (<https://tatjanosmasazai.lt/>)
-  golden-hands.lt - Golden Hands - signs and advertising constructions, Vilnius. (<https://golden-hands.lt>)

BILOHASH Ecosystem - All Live Demos
